FUNCTION: VDR MEDIATES THE ACTION OF VITAMIN D3 BY CONTROLL
THE EXPRESSION OF FORMONE SENSITIVE GENES.
SUBCELLULAR LOCATION: NUCLEAR.
SUBCELLULAR LOCATION: NUCLEAR.
BODMAIN: COMPOSED OF THREE DOMAINS: A MODULATING N-TERMINAL
A DUA-BINDING DOMAIN AND A C-TERMINAL STEROID-BINDING DOMAI
A DUA-BINDING DOMAIN AND A C-TERMINAL STEROID-BINDING DOMAI
SIMILARITY: BELONGS TO THE NUCLEAR HORMONE RECEPTORS FAMILY
                           NR1 SUBFAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                PQICRYCGDKATGYHFNYMTCEGCKGFFRRAMKRNARLRCFFRKGACEITRKTRRQCQAC 136

DISEASE: DEFECTS IN UDR ARE THE CAUSE OF TYPE IIA RICKETS (ALSO KNOWN AS HYPOCALCEMIC VITAMIN D-RESISTANT RICKETS (HYDRR)). HYDRR IS MOST FREQUENTLY AN AUTOSOMAL RECESSIVE DISORDER CHARACTERIZED BY SEVERE RICKETS, HYPOCALCEMIA AND SECONDARY HYPERPARATHYROLDISM SIMILARITY: BELONGS TO THE NUCLEAR HORMONE RECEPTORS FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  CAUTION: IT IS UNCERTAIN, WHETHER MET-1 OR MET-4 IS THE INITIATOR

"A new orphan member of the nuclear hormone receptor superfamily the subset of retinoic acid response elements.";

Mol. Cell. Biol. 14:1544-1552(1994).

-I- FUNCTION: BINDS AND TRANSACTIVATES THE RETINOIC ACID RECEPTOR ELEMENTS THAT CONTROL EXPRESSION OF THE RETINOIC ACID RECEPTOR BETA 2 AND ALCOHOL DEHYDROGENASE 3 GENES.

-I- SUBGULIULAR LOCATION: NUCLEAR (BY SIMILARITY).

-I- TISSUE SPECIFICITY: PREDOMINANTLY EXPRESSED IN LIVER.

-I- SIMILARITY: BELONGS TO THE NUCLEAR HORMONE RECEPTORS FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    15-JUL-1999 (Rel. 38, Created)

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                protein - protein search, using sw model
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Pred. No. 18 the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                   768
